

Quikscribe Recorder Enhancements

<i>Date</i>	<i>Version #</i>	<i>Description</i>
21-Apr-17	10.0.0.18	Detailed log added on recorder routine.
25-Jan-17	10.0.0.17	New QuikscribeDownloader Version New SequentialFileSender Version
22-Jan-17	10.0.0.16	Lock file routine changes. New version QuikscribeDownloader.
24-Dec-16	10.0.0.15	Change rename file routine Change lock file routine.
11-Dec-16	10.0.0.14	Lock file routine revision.
03-Dec-16	10.0.0.13	FTP Routine Revision to use QuikscribeShared Folder.
26-Nov-16	10.0.0.12	Add Path box changed to easily copy/pasting folder path. Changed FTP Send File screen (incorrect color on panel)
19-Oct-2016	10.0.0.10	.MOV Files compliance to import on Quikscribe File Format Internal Routines Enhancements QuikscribeDownloader revision.
9-Sep-16	10.0.0.9	Form Layouts enhancements FTP Routine Enhancements Mail Sender Enhancements Grundig Routine Revision
8-Jan-16	8.0.0.513	Corrected a problem related to the 32bit operating systems.
4-Nov-15	8.0.0.512	Changed the Diagnostic feature to output errors to the log file. Added the feature to Reset the device to factory defaults on Quikscribe Downloader.
4-Nov-15	8.0.0.511	Updated the Diagnostic tool to show the exact path on 64 bits Windows platforms.
4-Nov-15	8.0.0.510	Removed the Olepro32.dll from the dependencies list.
3-Nov-15	8.0.0.509	Updated the Diagnostic Tool. Corrected a problem related with the IAF Encryption.
28-Oct-15	8.0.0.506	Removed the IafCryptomodule.ocx Updated the encryption scheme. Corrected a problem in the SequentialFileSender Corrected a problem related to the IAF Fields.
02-Oct-15	8.0.0.490	Added a menu item "Troubleshooting Tips"
28-Sep-15	8.0.0.489	Added a Diagnostic tool to help identify issues.
28-Sep-15	8.0.0.489	Added a verification functionality to ensure the operability of QSR.
04-Sep-15	8.0.0.486	Corrected a problem when selecting the send destination.
04-Aug-15	8.0.0.484	Added HandControl Comm-Port for "Digta SonicMic 3" and "Digta SonicMic 3 i Classic"
22-Jul-15	8.0.0.483	Added the ability to arrange the columns display and sorting in the Detailed Directory View.
20-Jul-15	8.0.0.474	Changed the log path.
03-Jul-15	8.0.0.471	Corrected a problem when changing the profile.
02-Jul-15	8.0.0.470	Added the support for the Grundig Digta SonicMic 3 hand control.
22-Jun-15	8.0.0.431	Corrected a problem when using the System Folder Browser.
15-Jun-15	8.0.0.413	Changed the Font type to Tahoma.
11-Jun-15	8.0.0.411	Added the support for extended character sets.
04-Jun-15	8.0.0.385	Added the ability to sequentially open files through the "Open" SDK Command.
02-Jun-15	8.0.0.378	QuikscribeDownloader - Added the confirmation message when

		Automatic Selection is set to "Do Not select any files".
01-Jun-15	8.0.0.378	Corrected an issue that caused the Percentage field to show an incorrect value.
28-May-15	8.0.0.374	Added the Requested Typist field when sending a file.
18-May-15	8.0.0.369	Added the ability to send to multiple email recipients.
11-May-15	8.0.0.348	Added the ability to send to multiple typists.
05-May-15	8.0.0.319	Corrected the loading of the Recorder Manager. Corrected a problem related with the Olympus SDK.
24-Apr-15	8.0.0.293	Removed the ability to add an executable to a marker.
21-Apr-15	8.0.0.278	Added the support for the Olympus DR-2200 hand control. Corrected an issue with the Olympus SDK which caused the QSR to terminate. Added the capability to automatically add the QSR to the Windows Firewall Exception list. Improvements to access the Registry. Corrected an issue on the Concurrent Licensing functionality. Corrected an issue that caused the QSR to return to Demo mode. Corrected an issue on the Quikscribe Downloader that caused to show duplicated disks. Corrected an issue in the Hand Control Tutorial which caused the audio to be played when using the Olympus DR-2200 device. Corrected an issue with the Olympus Server to launch properly on 64 bit platforms.
16-Apr-13	7.2.0.207	Corrected Four Button Footswitch left pedal not functioning correctly. Corrected toggle mode for right two buttons of four button foot pedal Remove Verbose log for Mixer Controls
8-Apr-13	7.2.0.195	Added four pedal footswitch
20-Mar-13	7.2.0.191	Modified code so Philips code is not called until a check for foot-control done first
15-Mar-13	7.2.0.184	Added tests for lower characters testing Network addresses (QuikscribeDownloader.exe 7.2.0.62)
11-Mar-13	7.2.0.176	Corrected QSDownloader loading incorrect profiles for disk integration (QuikscribeDownloader.exe 7.2.0.61)
11-Mar-13	7.2.0.176	Sent QSDownloader profile to concurrent licence server. Corrected QSDownloader Failing to reload disk integration. (QuikscribeDownloader.exe 7.2.0.58) Made auto-level adjust an install option
25-Feb-13	7.2.0.174	Added ability to re-poll licence server immediately after changing profile (QSRConcurrentLicence.dll 1.0.0.30)
25-Feb-13	7.2.0.173	Added WM_RECORD_LEVEL to logs Limited message polls to Concurrent licence server (QSRConcurrentLicence.dll 1.0.0.29)
11-Feb-13	7.2.0.172	Corrected DPM device settings loading corrected values from device (QuikscribeDownloader.exe 7.2.0.49) (QSRConcurrentLicence.dll 1.0.0.26) (QSDownloadConcLicence.dll 1.0.0.5)
31-Jan-13	7.2.0.169	Added ability to get and set microphone levels from settings Added Ability to account for identical sent filenames

		(SequentialFileSender.exe 4.0.0.136) Added scroll for open dialogs Added network sent path (RecorderManager.exe 2.0.0.42, QuikscribeDownloader.exe 7.2.0.39)
10-Jan-13	7.2.0.158	Added Ability to set Concurrent Licence server through settings and through environment. Stopped caused by concurrent licence being checked in Licence Info page Added ability to set send paths from QSDownloader (QuikscribeDownloader.exe 7.2.0.38) (QSDownloadConcLicence.dll 1.0.0.3) Removed DPM Files menu item from file menu Added automatic audio level adjustment
25-Oct-12	7.2.0.99	Corrected duplicate files being created immediately after sending a file Only made demo warning come up once QSDownloader.exe 7.2.0.15)
20-Sep-12	7.2.0.17	Added ability for QSDownloader to skip device setting synchronisation with Philips DPM, giving a great improvement in load up time of QSDownloader when DPM is connected (QSDownloader.exe 7.2.0.12)
13-Sep-12	7.2.0.16	Tested for paths in template file and disabled ability to set them on local profiles if set there Removed Local Profile Template Gave prompt that profile template exists if in the default profile location
6-Sep-12	7.2.0.9	Removed file cleanup from QSR as it is already in Record Manager Moved removal of temp files to RecorderManager.exe (2.0.0.40) Resolved race condition that caused regeneration of same filename when using create file after send
23-Aug-12	7.2.0.1	Changed extension of Diagnostic files for tech support to _ip instead of zip
12-Jul-12	7.2.0.0	Added disabled Integration in log Enabled writing verbose log when called from second instance
28-Jun-12	7.1.0.404	Corrected colours of sent files to reflect overdue files
28-Jun-12	7.1.0.385	Added Integration message to indicate integration disabled
23-Mar-12	7.1.0.375	Added calls to release Licence client (QuikscribeDownloader.exe 7.1.0.34) (QSDownloadConcLicence.dll 1.0.0.2) (QSRConcurrentLicence.dll 1.0.0.23)
15-Mar-12	7.1.0.374	Added Concurrent Licensing to QSDownloader (QuikscribeDownloader.exe 7.1.0.32) Added Action to cause windows firewall to prompt for permission
8-Mar-12	7.1.0.361	Removed Net Hasp Added Concurrent Licensing Defaulted Computer ID to computer name instead of date format
19-Jan-12	7.1.0.311	Added option to disable SSL/TSL connections when sending email via custom SMTP server (QuikscribeDownloader.exe 7.1.0.25) (SequentialFileSender.exe 4.0.0.132)
21-Dec-11	7.1.0.302	Increased size of registration page
24-Nov-11	7.1.0.295	Stored auto sequence number and allowed it to be reloaded from a

		profile Made “delete days”, “Filesender retry period”, and “Current Auto Number” only take number values
10-Nov-11	7.1.0.279	Added the ability to add additional attachments when submitting support request Changed colour of text to blue when being edited in the open file dialog Added dropdown for Document type and Matter Numbers Prevented losing edited changes on open dialog when enabling or muting audio preview. Added ability to press escape key on edited field in open dialog to return to previous value. Made open dialog wider
20-Oct-11	7.1.0.257	Corrected Application crashing when deregistering
20-Oct-11	7.1.0.254	Added support for Philips 2330 four button footswitch. Added ability to assign buttons on existing Philips footswitch
22-Sep-11	7.1.0.238	Added Sample rate and compression to table view Added Option to copy files to hard drive before converting DSS files(QuikscribeDownloader.exe 7.1.0.24)
15-Sep-11	7.1.0.231	Built against new Merge Modules Added Error messages from Philips code to enable more meaningful errors in the logs (QuikscribeDownloader.exe 7.1.0.19)
15-Sep-11	7.1.0.230	Stopped writing unique ID file when Disk Integration is not being used (QuikscribeDownloader.exe 7.1.0.14)
9-Sep-11	7.1.0.229	Made preview use next available filename if conversion fails (QuikscribeDownloader.exe 7.1.0.13)
7-Sep-11	7.1.0.228	Enabled non-DPM devices to be displayed in Profile Editor and have their own profiles (QuikscribeDownloader.exe 7.1.0.10)
7-Sep-11	7.1.0.226	Tested that copy file actually worked before accepting that file was sent (SequentialFileSender.exe 4.0.0.129)
26-Aug-11	7.1.0.225	Modified exit code to prevent application error when pressing Factory reset
25-Aug-11	7.1.0.220	Modified exit code to prevent application error when pressing exit button
23-Aug-11	7.1.0.198	Added Barcode event to allow for faster machines to display Barcode in Matter Number Added computer ID and stored to registry to enable same ID to be used when registering computers Added additional diagnostic registration messages to log
4-Aug-11	7.1.0.168	Corrected Potential logic error in BugReport Displayed Log Files In explorer on Send Via Email Corrected audio preview not working on Open dialog Fixed Step-by-step footswitch support
30-Jun-11	7.1.0.156	Added DR-1000 and DR-2000 as Selectable handcontrols in settings Used internal web browser to check latest version
17-Jun-11	7.1.0.142	Disabled display of Custom button functions for Hotkeys Removed unnecessary Philips merge modules from install
9-Jun-11	7.1.0.139	Adjusted size of Send Key Button form Corrected “Keep QSR display as foreground” from causing QSR to

		<p>behave incorrectly with speechmike.</p> <p>Added Run Program Button Function</p> <p>Corrected SendKey Function comments not being saved to the profile</p>
26-May-11	7.1.0.88	Disabled Quikscribe SMTP settings button if overridden in template
19-May-11	7.1.0.85	<p>Added Quikscribe SMTP settings button to avoid problems occurring with client SMTP servers</p> <p>Gave more detailed description of email failures when using SMTP server (SequentialFileSender.exe 4.0.0.127)</p>
12-May-11	7.1.0.54	<p>Added option to search Outlook for email addresses</p> <p>This was made to prevent email from trying to go to outlook to load email addresses in the email paths, which was always getting a warning from windows.</p> <p>Added SendKeys function and displayed description in flex grid</p>
5-May-11	7.1.0.25	Enabled QSAuthor emails
17-Mar-11	7.1.0.0	<p>Added Step by step footswitch</p> <p>Moved all domains to Quikscribe.com</p> <p>Update QuikscribeDownloader to 7.1</p>
11-Feb-11	7.0.0.195	<p>Made it possible to detect default Input and Output device for Vista and newer versions</p> <p>Corrected QSDownloader from not displaying Audio duration in QSManager and Explorer (QuikscribeDownloader.exe 7.0.0.62)</p>
4-Feb-11	7.0.0.190	<p>Added Record Level Menu Item</p> <p>Added Record and Playback Device Settings</p>
20-Jan-11	7.0.0.176	<p>Corrected Field values not being displayed on Open File dialog</p> <p>Corrected crashing when no files displayed in open dialog</p> <p>Added Support for 3200 Speechmike</p>
17-Jan-11	7.0.0.166	<p>Made copies of profiles before adding to Zip file for Tech Support</p> <p>Wrote and read FTP voice recognition into and from profile file (QuikscribeDownloader.exe 7.0.0.60)</p>
12-Jan-11	7.0.0.154	<p>Added Voice Recognition per path</p> <p>Corrected QSDownloader that it always displayed a warning message if QSR had "Just Send File" selected and QSDownloader profile had "Prompt for send location" enabled.</p> <p>Corrected send options not being added when no profile is set in DPM</p> <p>Corrected Due Time, not being set when sending files in QSDownloader Profile (QuikscribeDownloader.exe 7.0.0.59)</p>
16-Dec-10	7.0.0.63	Added Philips 3210 Speechmike
18-Nov-10	7.0.0.56	<p>Added Additional hardware checks to stabilise licensing problems on Windows 7.</p> <p>(QuikscribeDownloader.exe - 7.0.0.50)</p> <p>Closed FTP Ports after sending files when no longer is use (SequentialFileSender.exe - 4.0.0.127)</p>
9-Nov-10	7.0.0.54	Added Post Clip function to prevent handcontrol stop button from making clicking sounds(Filecontrollerdll.dll 11.7.1.0)
29-Oct-10	7.0.0.42	Erased all log files when clicking "Erase Log"
26-Oct-10	7.0.0.40	<p>Added tests for Nic Cards being renamed on some systems</p> <p>Added Additional Testing for Voice Recognition (QSVoiceRecognition.exe 1.1.0.48)</p>

		Modified Memory to used Fixed memory in case it was causing lockup (qsfformat.dll 12.0.3.0)
18-Oct-10	7.0.0.37	Modified QSFFormat.dll to prevent corrupt audio by returning a failure if unable to write to disk (qsfformat.dll 12.0.3.0)
23-Sep-10	7.0.0.35	Stopped QSR from going centre screen when Keep Foreground selected
16-Sep-10	7.0.0.30	Added Online Manual Added File Cleanup in Recorder Manager (RecorderManager.exe 2.0.0.39) Added Reset Hand control mapping Button to settings Added Erase Log Corrected Grundig from sending record messages twice after pressing another button Added Additional Logging (QuikscribeDownloader.exe 7.0.0.48)
22-Jul-10	7.0.0.19	Stopped prompting of device changes when disk integration is used (QuikscribeDownloader.exe 7.0.0.34)
16-Jul-10	7.0.0.18	Corrected Send dialog locking up when invoked while QSR is minimised Added Support for Loading Wave and MP3 formats for Quikscribe Downloader (7.0.0.27) Added caching of QSDownloader profiles (RecorderManager.exe 2.0.0.32)
15-Jul-10	7.0.0.15	Added QuikscribeDownloader.exe to Close Process script (CloseQSPrograms.vbs) Changed name of QSDpmProject.exe to QuikscribeDownloader.exe Displayed message unable to Send empty dictation Enabled setting Send options with PreventZeroFiles enabled Added Icon balloon for failed File Send(SequentialFileSender.exe 4.0.0.125)
8-Jul-10	7.0.0.12	Increased version of DPM Downloader (QSDpmProject.exe 7.0.0.1) Moved window out of minimised when MoveQSRTToFront is set
7-Jul-10	7.0.0.10	Removed Save profile when displaying settings Corrected Profile template from not disabling settings
1-Jul-10	7.0.0.5	Automatically started Record Manager to copy remote profiles to local. Updated Splash Screen Updated V7 Licensing Improve Startup time by causing RecordManager to copy Local Profiles
16-Jun-10	6.3.0.305	Added missing comct232.ocx dependency
10-Jun-10	6.3.0.304	Added Option to Disable sending zero Length Files Added Option to define File sender retry Time (SequentialFileSender.exe 4.0.0.114) Added alternate DSS conversion function for systems that have problems using Philips conversion (QSDpmProject.exe 6.3.0.12)
27-May-10	6.3.0.294	Performed Silent Reload of Leased Licences when in check mode
13-May-10	6.3.0.289	Did not copy profile back when doing a Profile change in order to prevent overwriting new profiles
13-May-10	6.3.0.287	Enabled Detailed Logs to remain detailed for a maximum of 30 days Turned detailed log on when submitting report Caused detailed Log to Start if registration fails

5-May-10	6.3.0.282	Removed ability to attach files from explorer or through integration Removed PowerPoint integration Removed Drag Drop ability Removed memory signing in dlls (filecontrollerdll.dll 11.6.2.0, qsfformat.dll 12.0.2.0)
3-May-10	6.3.0.266	Prevented removal of markers when performing an overwrite Prevented removal of markers when doing an undo edit Removed drag and drop ability to prevent corruption from programs doing silent Drag drop functions
28-Apr-10	6.3.0.261	Ignored repeated Grundig Messages
28-Apr-10	6.3.0.260	Trimmed spaces from device names to enable them to be set correctly from settings Added Grundig Hand Control
26-Mar-10	6.3.0.243	Corrected Display of Protect Content when closing or sending a file
25-Mar-10	6.3.0.242	Enabled protect content menu to prevent a file from being opened by QSR if incorrect password is used Enabled Icon Flashing for Vista Enabled Reading of Olympus Meta Data to enable sending files as Urgent (QSDpmProject.exe 6.3.0.8)
17-Mar-10	6.3.0.238	Added LED display for Speechmike Air Saved local profile after performing any function that needs to be saved Copied local profile to remote profile when QSR Shuts Applied caching to optimise mapped path settings Removed test for mapped paths each time a file is opened to reduce load time
5-Mar-10	6.3.0.226	Corrected Duration not storing when sending files across LAN Added detection of Windows changing record and playback devices
4-Mar-10	6.3.0.219	Corrected pre-emption causing wrong microphone device from being set when a file is first opened
4-Mar-10	6.3.0.215	Removed options to record mouse and to undo marker edits after save in attempt to prevent file corruption on some systems
26-Feb-10	6.3.0.214	Made a copy of Log file because some systems will not add to issue attachment zip file Only performed one way synchronisation of profiles for integration with manager (RecorderManager.exe) 2.0.0.27 Performed synchronisation of all profiles
25-Feb-10	6.3.0.213	Displayed Correct Licensing status for DPM Downloader (QSDpmProject.exe 6.3.0.7) Added individual attachment snapshots for each issue submission Added Error messages where unable to read file information (SequentialFileSender.exe 4.0.0.107)
17-Feb-10	6.3.0.212	Caused non-ready mapped drives to display actual UNC paths (RecorderManager.exe 2.0.0.26) (SequentialFileSender.exe 4.0.0.106)
16-Feb-10	6.3.0.206	Corrected Factory Reset Provided overriding for non-ready Mapped paths for reports folder (SequentialFileSender.exe 4.0.0.105)
16-Feb-10	6.3.0.205	Provided overriding for non-ready Mapped paths (SequentialFileSender.exe 4.0.0.104)

		(RecorderManager.exe 2.0.0.24)
15-Feb-10	6.3.0.196	Corrected Prompt dialog returning before user made selection Provided Synchronisation of profile files (RecorderManager.exe 2.0.0.23)
28-Jan-10	6.3.0.185	Enabled Licensing for DPM (6.3.0.6) Updated SMTP email (SequentialFileSender.exe 4.0.0.99)
11-Jan-10	6.3.0.181	Displayed User Status display that file was sent as urgent from Hand control button Enabled Send as Urgent option to be zero seconds Displayed Overdue files in Sent Directory in Red Obtained Windows version 7 as operating system for Tech Support Submissions Made prompt dialog on creating new file when file is open always on top. Added Detailed Log to Recorder Manager Added Player Markers to Notification (RecorderManager.exe 2.0.0.18)
18-Dec-09	6.3.0.174	Made DPM Drivers go in by default Deleted new file created with zero duration if an existing file is opened from command line or last file Corrected hand control failing after prompting action when file is already open Corrected Handcontrol loading Speechmike drivers when VIS unit selected.
9-Nov-09	6.3.0.163	Did not display Help Menu Item for Vista or above Added facility to scan into folders when using disk integration for integration with Olympus (QSDpmProject.exe 2.1.0.345) Corrected Audio duration not being shown in open dialogs
5-Nov-09	6.3.0.159	Added Keep QSR display as foreground while dictating Stopped copy of sent file appearing in Sent Directory when sending file with DPM Downloader (QSDpmProject.exe 2.1.0.342)
22-Oct-09	6.3.0.154	Added Addendum
22-Oct-09	6.3.0.140	Deleted IMF Files when resending Enabled Recall of Review Files Added Recall Menu Item Enabled Manager to Ignore Files resent unless message sent back from QSP (RecorderManager 2.0.0.14) Deleted Lock file when Resending original File (SequentialFileSender 4.0.0.95)
21-Oct-09	6.3.0.128	Added Review Folder Always displayed Locked Files Added Balloon text for Returned Management files (RecorderManager 2.0.0.7) Added display for Typist request
30-Sep-09	6.3.0.111	Added Speechmike Air 3020
24-Sep-09	6.3.0.106	Stopped Air300 form back from Showing
24-Sep-09	6.3.0.105	Added Speechmike AIR 3000
24-Sep-09	6.3.0.99	Replaced reference to legacy Speechmike DLL as it is now included in Philips Merge Module.

23-Sep-09	6.3.0.90	Corrected Foot control Sending Files always Urgent
15-Sep-09	6.3.0.89	Prevented filenames starting with numbers appearing incorrectly in Open file dialogue. Prevented removing undo data when sending file (SequentialFileSender.exe 4.0.0.92) Updated QSFFormat.dll in attempt to prevent windows optimizations corrupting files (qsfformat.dll 12.0.0.0)
1-Sep-09	6.3.0.83	Corrected Double Click on Open File dialogue not opening files
25-Aug-09	6.3.0.78	Removed Invalid Characters from User ID which prevented page from loading
18-Aug-09	6.3.0.73	Modified QSFFormat dll to prevent recording to a file that may become corrupt (QSFormat.dll 11.7.0.0)
12-Aug-09	6.3.0.71	Forced Save of email if not set when Generating Bug Report
06-Aug-09	6.3.0.67	Corrected Inability to set VIS station when a USB footswitch is plugged in also
07-Jul-09	6.3.0.65	Forced reading of stored profile in sent file when using multiple profile (SequentialFileSender.exe 4.0.0.90)
07-Jul-09	6.3.0.64	Made generation of temporary uncompressed files to be based on source filename and global converted file number. Prevented detailed log from overwriting old log for DPM Downloader (DPMProject.exe 2.1.0.340)
25-Jun-09	6.3.0.63	Implemented stricter Lease licensing behaviour Added Scan Rate for Record Manager (RecorderManager.exe 1.0.0.49)
10-Jun-09	6.3.0.51	Moved Files directly to pending directory instead of copying to both sent directory and pending Removed Express send option Corrected Lastfile menu item from showing same file multiple times (SequentialFileSender.exe 4.0.0.88) (QSDpmProject.exe 2.1.0.331)
1-Jun-09	6.3.0.27	Corrected Percentage complete of encrypted files (QSFFormat.dll 11.6.0.0)
26-May-09	6.3.0.26	Reinitialised IAFCrypto for Each Send (SequentialFileSender.exe 4.0.0.84)
26-May-09	6.3.0.21	Corrected Inability to set Encryption Key
18-May-09	6.3.0.19	Moved Logs so they were in Local App directory (RecorderManager.exe. 1.0.0.43) (SequentialFileSender.exe 4.0.0.82) (FileSender 2.3.0.35) (DPMProject.exe 2.1.0.330)
14-May-09	6.3.0.16	Removed Unnecessary entries in RecorderManager Log (RecorderManager.exe 1.0.0.41)
12-May-09	6.3.0.15	Set Default Compression to Real-time compression Removed Input streaming from QSFFormat as it was causing corruption (QSFFormt.dll 11.4.0.0)
24-Apr-09	6.3.0.11	(QSDpmProject.exe 2.1.0.327) Enabled Users to Bypass Philips Integration and list removable drives
7-Apr-09	6.3.0.10	Added ability to Import Subfolders from Import path Added ability to use DPM sequence number (DPMProject.exe 2.1.0.302)

27-Mar-09	6.3.0.5	Made Detailed View Enabled so Font Appears Black Moved integrated online issue database Made Install close all QS apps on install and uninstall
6-Feb-09	6.2.0.232	Corrected Not finding Pending file as defined in profile (SequentialFileSender 4.0.0.80)
12-Dec-08	6.2.0.229	Added Logging to SequentialFileSender (4.0.0.77) Modified Scan Pending Folder to optimise memory
25-Nov-08	6.2.0.227	Moved Generation of Reports into Sequential File Sender (SequentialFileSender.exe 4.0.0.74, FileSender.exe 2.3.0.30)
18-Nov-08	6.2.0.226	Added user based licence Recovery
14-Nov-08	6.2.0.219	Performed direct SendPending files without requiring tests Set Windows Handle for Sequential File Sender to be after registration of message interface (SequentialFileSender.exe 4.0.0.72) Perform File for DPM Downloader through Sequential File Sender (QSDpmProject.exe 2.1.0.293)
13-Nov-08	6.2.0.218	Modified SequentialFileSender so it activates by receiving messages(4.0.0.70)
6-Nov-08	6.2.0.215	Changed Display of SendBrowse to enable UNC paths Replace FileSender with SequentialFileSender
30-Oct-08	6.2.0.210	Added Subject, Matter and Doc fields to DPM Downloader (2.1.0.292)
23-Oct-08	6.2.0.208	Checked for maintenance date before displaying Maintenance Expired
2-Oct-08	6.2.0.207	Updated Hasp Licences
	6.2.0.205	Made sure we got a temp filename if windows failed to create one of its own (DPM Downloader 2.1.0.263)
	6.2.0.204	Generated Windows temp filename to create Uncompressed filename (DPMDownloader 2.1.0.260)
	6.2.0.203	Changed Default QSFiles path to C:QSFiles (Recorder Manager 1.0.0.39) DPMDownloader (2.1.0.258) added Date Created. Added ability to set send path when sending files Added VR Integration
	6.2.0.198	DPMDDownloader (2.1.0.251 Added Automatic Transfer)
	6.2.0.197	Stopped Display of errors within Message Box and retrieved via function call (ImpDs.dll 5.2.0.0) DPM: 2.1.0.218 Removed Options from front of downloader front page Reloaded FileList after settings are displayed Added Automatic Transfer Changed Automatic Check of EOL files to include all files
	6.2.0.196	Removed CheckNetworkDongle from Profile and moved into registry Prevented Network dongle from Showing Registration screen on startup
	6.2.0.195	Ignored encryption setting for DPM devices that do not support

		Encryption (DPM Downloader 2.1.0.206)
	6.2.0.194	Corrected Factory reset Only provided warning for non-fixed drive Added UNC Path Mapping Added Special Folder redirection registry keys to Bug reports Corrected Speaker Icon from being hidden in Open dialog Enabled naming of Send Path Mappings Added Shell32 browse for folders
	6.2.0.170	Modified Send Status Form Added Pending path to Normal Open View
	6.2.0.163	Added Rockey Licence
	6.2.0.148	Tested Date difference Field In Sent File(RecorderManager.exe 1.0.0.38)
	6.2.0.147	Modified Registration file as it caused problems with some drive serial numbers
	6.2.0.145	Prevented DPM from prompting profile change when profile file does not exists(QSDpmProject.exe 2.1.0.202) Enabled Voice Recognition to be set or unset on per file basis
30-Jun-08	6.2.0.143	Tested for File Property Changes on open dialog before allowing user to change files or unselect file Updated QSFFormat.dll to 11.1.0.0 to enable deleting fields
	6.2.0.139	Copied profile to Temp Directory to Improve performance over WAN
	6.2.0.137	Removed Caching of Profiles to local folder Stopped Loading of Default Profile DPMDownload 2.1.0.193 RecorderManager 1.0.0.35
	6.2.0.131	Corrected "Send Pending files" Added Option to test for existing paths Added Template To Bug Report
	6.2.0.126	Prevented concurrent attempts to save in order to prevent IAF file corruption (QSFFormat.dll. 11.0.0.0) Added Retry for Failed Save
	6.2.0.123	Enabled Voice Activation when using Speechmike for record and playback
	6.2.0.121	Moved Technical support Page to smartcontroller server Prevented Default Required time from being Urgent
	6.2.0.117	Corrected Voice activation Not Working with Non Default Recording Device (Filecontrollerdll 11.2.0.0) Forced DPM to Load profile From Disk (DPM 2.1.0.192)
	6.2.0.116	Forced copy of remote profile to local if remote profile is newer
	6.2.0.111	Added Ability to Local Import of DS2 files (DPMDownloader 2.1.0.189) Enabled RecorderManager to scan all profile paths (1.0.0.27) Copied all Profiles to Local Folder Added DPM Profiles to Bug report Zip file Added Remote Management Path to Log
	6.2.0.101	Enabled DPM profiles to determine QSR profile
	6.2.0.100	Made Settings text enabled font colour Added Manual Button for Request technical Support

		Made Fonts Darker in Open Dialogue Added Exception handler for ImageX
	6.2.0.89	Enabled option to Display Send paths when Starting or changing profiles. Corrected Fast-forward jumping to incorrect place Caused Loading of Olympus settings after displaying tutorial
	6.2.0.83	Enabled users to set send priorities
	6.2.0.82	Made support request run in its own Browser
	6.2.0.76	New Install
	6.2.0.75	DPM 2.1.0.70 – Added Compact Command so Post Compression works File Sender 2.3.0.27 – Added Compression whether Compact was required or not Made Tech Support Request Asynchronous
	6.2.0.68	Zipped Files Required For Support Caused all Support to be done online Loaded Email address from Outlook contacts
	6.2.0.30	Loaded Profile Templates from Current Profile Directory
	6.2.0.27	Only Enabled Authorisation if SMTP Server Is Defined Save Authorisation Option Only allowed SMTP authorisation if server name is defined Corrected multiple definition of Hotkeys Disabled Voice Activation if Set in template
	6.2.0.23	Limited maximum filename length of sent file to 63 characters
17-Jan-08	6.2.0.21	Made Version display 6.2.0.x instead of 6.002.x Added Maintenance Date To Bug Report and Log Added Ability To Download Latest patch
	6.2.0.10	Added profile name as a field Limited Keyword DPM length to 12 Characters (DPM 2.1.0.69)
	6.2.0.8	Forced Working path to be Fixed disk Enabled Import of Markers from DSS files
10-Dec-07	6.2.0.5	Enabled Sound properties for VISTA Mixer. Corrected Delay in File Stopping (Filecontrollerdll.dll 11.1.0.0) Modified DPM Downloader to Import Markers (QSDpmProject.exe 2.1.0.57)
6-Dec-07	6.002.03	Enabled Flashing icon for non VISTA Update QSFFormat.dll (10.2.0.0)
	6.002.01	Tested For Corrupt file status Added DPM Keywords Added Ability for Licence to remain stable when moving between time zones
	6.1.0.151	Disabled flashing icons as it was causing VISTA to lock up
	6.001.134	Added DSS Markers (QSDpmProject.exe 2.1.0.7) Added File Split options on DPM Send Added DPM markers to DPM Downloader
	6.001.132(b)	Added Logging and Environment Paths to scan paths for Recorder Manager (1.0.0.12)

	6.001.132	Corrected handling of exception licence case where laptop is moved to different network
	6.001.130	Disabled Settings if items are defined in profile Template Enabled File Management paths to be defined with HKEY local machine reg keys
	6.001.127	Corrected Daylight Saving time From disabling registration
	6.1.0.113	Made it impossible to set combo to urgent when no file is open Prompted user to save settings if they change notification without sending file. Enabled QSR Profile Paths to be set from Registry Disabled ability for user to select profile path if enterprise settings are enabled
	6.001.99	Enabled Comments in QSR Send
	6.001.95	Corrected Urgent files not starting with 00
	6.001.79	Added Additional Diagnostics Made Files upload as .tmp files using FTP (File Sender 2.3.0.26) Modified DMPDownloader to use newer Merge Modules
	6.001.67	Caused Restart Message when Setting Display Detailed View Added All Logs in Bug Report Moved Detailed Display So one under each other
	6.001.50	Added Today and Tomorrow as Required by on Send Dialogue
	6.1.0.41	Corrected Audio Duration when splitting files (FileSender - 2.3.0.20) Added Secretary Email label to Settings
	6.1.0.40	Added ability to set the record and playback devices
	6.1.0.32	Deleted attachments from Deleted Markers when sending file
	6.1.0.29	Made Seek Speed use a slider
	6.1.0.25	Enabled button options to be mapped for each VIS button Make Rewind and Fast Forward use consistent timings
	6.1.0.3	Corrected New and Maintenance licences failing
	6.1.0.2	Added Subscription Licences
	6.0.0.266	Stored PowerPoint text into fields when building PowerPoint Attempted to clear Read-only attributes on folders when setting working directories. Added Exception handling to Registration
	6.0.0.243	Changed Markers to GMT instead of Local Time Added extra Delay for Building first PowerPoint slide
	6.0.0.237	Added 5282 Speechmike Updated Speechmike Driver Added VU Meter When Performing PowerPoint Recordings
	6.000.215	Corrected Corruption of file when pressing send while recording
28-Jun-07	6.000.206	Integrated detailed views into standard exe
	6.0.0.200	Added Option for disable playing of 'File Sent' Enabled Configuration of Foot control Prevented deletion of audio when using voice activation
	6.000.176	Enabled Recalling of encrypted files
	6.000.173	Enabled use of Windows User Paths
	6.000.135	Enabled Easy Program of dongles by not sending NIC data when a Hasp Is plugged in Only allowed PowerPoint for Tutor Licences

	6.0.0.129	Added ability to hide QSR and show up in icon tray
	6.000.114	Enabled Build PowerPoint from Integration
	6.000.105	Disabled Send Button when no file is open
	6.000.104	Removed Licence Number when Deregistering
	6.000.98	Modified Tab Order on Send Dialog
	6.000.92	Enabled PowerPoint files to be opened when not a tutor
	6.000.90	Corrected integration calling send file incorrectly Enabled Mapping options for serial Hand controls Added Sound Card Diagnostics
	6.000.74	Enabled Settings to be completely reset to enable easier tech support.. Removed case sensitivity for Licensing Functions
	6.000.67	Corrected deregistration Crashing web registration server
	6.000.59	Added Olympus Hand Controls DR-1000 and DR-2000
	6.000.54	Added additional programmable DPM Buttons
	6.000.53	Added Philips DPM 9620 integration
	6.000.50	Added Deregistration of Manual Licences Added Manual Registration from web Browser
	6.000.14	Used 4 Digit Version Info Moved dsscore.dll to system32 to account for old Olympus software Updated qsfformat.dll to 8.2.0.0
	6.000.05	Enabled Importing of 8 Bit Wave Files
	6.000.02	Corrected Message stating that Licence could not be registered when it was
5-Apr-07	6.000.01	Added Recorder Management Removed legacy file management
5-Apr-07	5.022.715	Provided tolerance for Windows bridging
	5.022.704	Made status a long to differentiate between VB and C
30-Mar-07	5.022.701	Added VR warning Message Corrected Typist info not showing on file properties
	5.022.698	Added DPM 9600 integration
	5.022.696	Added Additional Persistence to Support Changing VISTA requirements
	5.022.667	Modified registration for VISTA machines
	5.022.664	Corrected Undo button on GUI from not working
	5.022.656	Added Error Correction for unavailable folder selection Added Management File Path
	5.022.650	Corrected Display of Splash and Hand control tutorials on widescreen notebooks
	5.022.644	Removed menu accelerators from main form and replaced with local hotkeys Loaded Hotkeys when Changing Profiles
	5.022.627	Added Doc Name and Doc Type to Detailed Views Set Focus to Send Button when loading send dialogue Set Focus To Slider for rewind and FF local Hotkeys
	5.022.618	Displayed author owner name in main caption
	5.022.617	Enabled Author to open files from Double Click Added registered Information on Splash Screen
	5.022.601	Enabled Upgrade of Sheriff licence Corrected Billable time on file properties

		Enabled the appropriate product to start when a file is clicked from explorer
	5.022.595	Tested All Network Cards
	5.022.593	Added ability to set FTP target directories intuitively
	5.022.591	Corrected Storage of FTP user Name
	5.022.590	Made FTP use encrypted password Copied file to temp dir if sending via MAPI – Filesender 2.3.7
	5.022.584	Enabled Setting of File format at new dialog Disabled setting of automatic Interview filename for Imported files if the default format is Interview Added Append Mode Added Default Record Mode Added Stored Record Modes Added File Types as Field Added Splash with Process description Corrected Rewind after Play to cause a force play instead of a toggle play Enabled Speechmike buttons to have different buttons perform identical functions but with different options Moved New file options to Global settings page Added toggle play mode for HID Foot pedal Made last files reflect change of profile Added Add File Attachment and add Marker attachment command line options Made it possible to add more than one file with identical names
	5.022.275	Changed File type to Intelligent.Audio in registry
	5.022.272	Enabled encryption to be set per file sent Sent deleted files to Recycle bin Added IafShell.dll and IafShell.exe to common path Made file list focused on open file Added the following Local Hot Keys Insert / Ovrwrt Ctrl + Q GoTo Begin Ctrl + B GoTo End Ctrl + E Toggle Record Ctrl + R Stop Ctrl + T Play Ctrl + L Send Audio Ctrl + G Close Audio Ctrl + H Corrected Tabbing of Record Buttons
	5.022.253	Enabled Sending using Netscape Updated FileSender 2.3.6
	5.022.251	Corrected Subject for Outlook Email
	5.022.249	Corrected selected options not working when send is clicked from Send Dialog. Replaced dialog boxes for setting of folders
	5.022.244	Modified message for Licence not found so it no longer stated a Quickscribe Hand control was not found Removed Legacy Serial licence

		Corrected error occurring when shutting QSR for the following hand controls: PHILIPS_EXEC6174, PHILIPS_EXEC6274, PHILIPS_LFH6284 Legacy QSR
	5.022.240	Added Outlook and non SMTP for sending files Corrected file sender generating an error on Post compression wave files
	5.022.218	Removed SMTP from settings and Moved to separate form Removed Call for settings on detailed views to ensure uniformity Added SMTP Authorisation
	5.022.190	Corrected red line appearing in Capture region
	5.022.189	Added ability to select screen region for capture from hand control button
	5.022.173	Added word to hand control function description
	5.022.172	Enabled selection of fixed region from hand control training
	5.022.170	Added audio prompts for new button functions
	5.022.167	Added File and Marker menu popup as assignable button functions
	5.022.158	5.022.158 Updated LED Code so Speechmike LEDS are only updated on each state change.
	5.022.156	Tested for Valid Hasp Ranges before forcing HASP requirement
	5.022.154	Disabled Removal of IRF licence with HASP Added ability to delay Voice Recognition when sending file to enable remote VR profiling (uses FileSender 2.2.8)
	5.022.143	Enabled Network HASP
	5.022.142	Added Additional Logging Information for Licences
	5.022.140	Changed Legacy Licence to Long to prevent Overflow
28-Dec-06	5.022.136	Added Additional Log for Web Hasp Licence
	5.022.124	Added Log comment using QSRInterfaceX
	5.022.114	Made Call to Web register from licence info form
	5.022.113	Stopped Automatic load of Web Registration form
	5.022.106	Added Force Stop button message type Made Web register come up for register
	5.022.96	Corrected Play after rewind
	5.022.93	Only displayed Web Login with Existing Sheriff Licence
	5.22.90	Enabled Hasp Licence to be stored from application
	5.22.80	Added Voice Recognition
	5.022.56	Tested for Enable Web Licence
	5.022.55	Added ability for default Licence Number
	5.022.44	Added File Position and duration to verbose log
	5.022.42	Added Web Registration Forced Web Registration form to load if they have existing licence and are not web registered
	5.022.08	Corrected inaccurate fields for Time Required and Author notification
	5.022.04	Updated Shared code with Player and Viewer Added Play After Rewind
	5.022.03	Added Registration
	5.022.01	Made Serial Number based on Ethernet card only
	5.022.00	Updated IRF Fields

	5.021.42	Added SendDeinitialisation on Exit Added Status Commandline Function
	5.021.39	Added Hand Control Button to Windows Messages
	5.021.32	Added Ability to Do rewind and FFwd from Windows Message
	5.021.29	Added Click Sound for Stop on Provide Audible Feedback
30-May-06	5.021.27	Removed Delay on Stop. Problem was fixed in Filecontroller.dll
	5.021.25	Added Date Time sent to file when sending via ftp
	5.021.24	Removed Marker Set Errors; Added delay from play to stop
9-Dec-05	5.021.05	Added Ability to Display Marker Form when creating Blank marker from hand control button
	5.021.01	Added Ability to Set SMTP Port
	5.021.00	Added Detect for new SpeechMikes; Added dependency for SpMikeCtrl.dll
	5.020.76	Hid option to Play after RW on slider hand control switch; Corrected Play After Rewind not working
	5.020.68	Added Additional SpeechMikes; Corrected Names of new SpeechMikes
	5.020.58	Made default Speech mike Tutorial form the classic pro
	5.020.57	Added Multiple Hand control Types
	5.020.39	Corrected send of ftp not being saved from the send dialogue
	5.020.39	Corrected Footswitch from Holding Rewind down
	5.020.37	Displayed Corrupt File Message
	5.020.36	Performed Checks for Author Files
	5.020.30	Made Send Form Go to top When Displayed
	5.020.29	Added Warnings for files existing in previous versions; Removed sending of non- iaf ending files
	5.020.22	Made profile Load when changing profile from Uer Profile
	5.020.20	Deleted recorder sub Branch on reset profiles.
	5.020.19	Added Ability to Delete Reg Branch and Profile File
	5.020.11	Added SMTP Server Details To File Going to Email; Added Environment Variable for Shared Dlls
	5.019.137	Added mac Address and Hasp Key to get drive serial number; Changed import to use fileimport instead of filecontroller
3-Jun-05	5.019.126	Corrected Path Name for SendFile when sending a filename
	5.019.125	Enabled export of Imported files; Modified licence registration; Made it possible to export audio for all files when the application has a valid licence
	5.019.97	Made Options for Open dialog alphabetical or date order
	5.019.96	Corrected Ascending and descending dates not showing
	5.019.95	Added Filesent message after sending file
	5.019.91	Added external DSS Import; Added Version info for ImpDs.dll
	5.019.88	Stopped Flicker of Mouse in sending of files
	5.019.84	Added Delete File Menu
	5.019.81	Changed Default Record settings to Post Compress and Medium Quality
	5.019.79	Corrected pre-emption and Voice Activation
	5.019.70	Tested Sent Path When Doing Postfix Filename
	5.019.68	Added Inline Audio Extract Functions
	5.019.60	Added Postfix Filename
	5.019.54	Updated SpeechMike Tutorial Forms
	5.019.33	Corrected Hand Control training not coming up for DPM 9400
	5.019.32	Added Hide Message to File Sender to prevent filesender from Sending Errors
	5.019.24	Played FileSent after Sending Via FTP and Email
	5.019.20	Added Close Button to Hand Control
	5.019.08	Checked For Files in the pending directory when getting from file menu
	5.019.02	Added 9450 Handset

	5.018.197	Stripped the path off name for master files as it was causing send to fail if file was in the sent directory
	5.018.196	Tested for valid path as soon as email has been clicked. This is to prevent first email address from failing
	5.018.178	Enabled QSR to Start Hidden
	5.018.174	Made Reload Display for Back Top button on hand controls work
	5.018.170	Added Ability to Create file by matter number on new file
22-Dec-04	5.018.140	Made All send processing done in the file sender
	5.018.120	Made Send Parameters for LAN become added to the IAF so the File Sender can look after them
	5.018.106	Prompted User for return address when sending email
	5.018.102	Tested for valid return email address before sending via email
	5.018.99	added the ability to add languages
	5.018.81	Added Exception handler for resize
	5.018.66	Added MSVCRT.dll to Install
	5.018.65	Tested for data on clipboard before making a marker; Cleared Clipboard if we created the data
	5.018.53	Added Exception Handler for RealTimeExtractor
	5.018.48	Saved Current Open file to Registry
	5.018.47	Added Append Mode to recorder; Synchronized files with MultiMono player modifications
	5.018.44	Asked if user wanted to stop recording if they were recording in interview mode
	5.018.23	Added mnuRealTimeExtract for Profile template
	5.018.21	Added Message box to request to stop recording when in interview mode
	5.018.00	Used New NCT OCX for Importing Audio
	5.017.633	Added Pacific Solutions As a default ftp
	5.017.622	Wrote App Path of last QSR being loaded so Other Apps can Read the path
	5.017.621	Prevented renaming of files when no split has actually occurred
	5.017.613	Made USB default Comm Port
	5.017.612	Added Days Remaining as a Profile Option
	5.017.609	Added Profile option to inhibit report files
	5.017.608	Prevented US SpeechMikes from stopping after releasing RW. Instead, allowed play to resume
	5.017.601	Removed Parts of Verbose Log; Stopped QSR becoming visible when receiving a new file message
	5.017.588	Added very High and Very Low record quality settings
	5.017.585	Added Send as Browse Option
	5.017.582	Prevented Open If IAFCrypto Fails to decrypt
	5.017.580	Corrected Double encryption of pending files
	5.017.578	Removed Call to Site Manager if Directory Does not exist to prevent infinite loop
	5.017.577	Returned Encryption as a Send Option
	5.017.575	Loaded Hand Control Menu Regardless of DPM status
	5.017.573	Disabled Automatic Sending Of DPM Files marked EOL
	5.017.571	Tested for stereo audio before importing
	5.017.570	Made test for app type in registration file case insensitive
	5.017.569	Made call to external DPM App; Enabled Long-play files to be imported; DPM load module
	5.017.552	Added Tool tips To Arrow Buttons
	5.017.551	Prevented assigned hand control buttons from stopping record when released; Added RW/FF
	5.017.526	Added Paste Audio to Hand control Tutorials

	5.017.506	Added Jog Wheel and Del Button Assignments to Tutorials
	5.017.501	Added 9400US Hand Control
	5.017.496	Changed call to UnloadUser Status contain exception handler; Added AudioControl DPM files
	5.017.456	Enabled Automatic Download and Send of DMP files
	5.017.411	Added Display for VIS external Mike
	5.017.404	Set Default VIS Microphone based upon registry Setting
30-Jun-04	5.017.383	Enabled Setting of PromptForProfile from profile paths; Corrected invalid address caused by missing "\" character on QSPROFILE and QSTEMPLATE environment variable
	5.017.363	Set Sequence enabled to false for all SpeechMikes with sliders
	5.017.358	PostCompleteRecordStatus
	5.017.351	Added Ability for QSRInterfaceDll and QSRInterfaceX dll to coexist in Path; Added Reg Option to prevent OCX from Being Initialized
	5.017.345	Corrected Clearing of current button
	5.017.344	Played Error sound when failing to record
	5.017.343	Removed Subject and Matter number Reg Keys as they were causing the "Just Send File" option to overwrite the Subject and Matter in the sent file
	5.017.339	Corrected Lockup
	5.017.287	Added Custom Commands
	5.017.279	Enabled Custom Hand control Buttons
	5.017.278	Added Custom Hand control Buttons; Allowed custom buttons and menus to work even if qsrinterface.dll is installed
	5.017.245	Enabled menu items to be hidden
	5.017.231	Added product badge ability; Prevented DSS path from being QSFiles\import
	5.017.212	Added Delay On launching files on Non NT platforms; Enabled Shell for NT Platforms
	5.017.207	Modified Marker Menu Items
	5.017.202	Added hand control training button to Settings; Add Marker & Attachment to Marker menu
	5.017.198	Added AddMarker And Attachment from hand control
	5.017.191	Stopped processing of VIS with Main if Vis Tutorial Showing
	5.017.190	Modified behaviour of VIS Hand Control training
	5.017.173	Modified Log menu Items; Enabled Third Party Licences
	5.017.167	Corrected Hotkeys not working
	5.017.164	Added Imported Marker files as file type without converting
	5.017.162	Added QSLicence
	5.017.154	Corrected Hand control rewind settings failing to save
	5.017.142	Corrected Error In failure to Import Directory
	5.017.140	Added Verbose Log
	5.017.126	Corrected multiple filenames in Main Caption
	5.017.121	Corrected Add Attachment type to OCX
	5.017.121	Added OCX Interface for importation of files
	5.017.117	Added View Log to Help Menu
	5.017.106	removed recursive loop on Application Exit
	5.017.105	Corrected QSR not setting exit upon closing
	5.017.67	Moved QsrInterfaceDll and QsrInterfaceX dll to different modules
	5.017.64	Added QSRINTERFACE_CLOSE as a return value to Send File command
	5.017.61	Added Prompt before issuing custom trial; Issued Custom trial when standard trial exists
	5.017.54	Added Trial Licence Message
	5.017.43	Removed check for network dongle on successful non dongle registration
	5.017.40	Added Messages for Net Hasp

	5.017.28	Enabled Users to change document information within open dialogue
	5.017.18	Corrected File Splitting errors for email and FTP
	5.017.14	Corrected Plain text and Rich Text from Hand Control; Saved Button settings form Hand control; Corrected CC from Support
	5.017.03	Corrected Load Profile Failure On start-up
	5.017.03	Corrected Disable of Hand Control twice in New File
	5.017.02	Performed “New File” button on successful send
	5.017.00	Added VIS Station
	5.016:108	Prevented all forms from Loading upon start-up in order to prevent the QSR hanging on start-up
	5.016:108	Added Live updating of file size during record to enable the transcription size to be read while recording
	5.016.26	Changed the value of the registry key REG_RECORD_MODE
